% PBS Ca	24.2%	58.3%	+141 %	SAR	12.1	0.21	- 98.3 %

October 2005, Hurricane Wilma pounded Key West and left the course submerged for weeks.

The above was accomplished with 6 consecutive monthly applications of Calphlex, Pervade and Trical. Significant reductions in Sodium, Bicarbonate and Chloride, while building Calcium levels in the soil.
